## Feline Spay

### What is a Spay (Ovariohysterectomy)?

A spay involves removal of the uterus and ovaries. This is done by entering the abdomen through a small incision near the belly button. All cats are sent home with pain control medication. Most animals tolerate this procedure well and return to their normal activity within 3-4 days. A spay incision takes 2 weeks to heal, and we recommend keeping a cone or onesie on during this time.

### Why is it important to get my cat Spayed?

Benefits of a spay include:

- Decrease unwanted pregnancies and surplus animal population
- Prevent uterine infections that can be fatal
- Prevent uterine and ovarian cancer
- Decrease marking and territorial behaviors
- Decrease inter-cat aggression
- Decrease wandering and yowling during heat cycles

We recommend  
spaying ALL cats at 6  
months of age.

### What is the cost of a Feline Spay?

Pre-Surgery Package		Surgery Package	
Pre-Operative wellness exam	\$120	Spay surgery bundle	\$310
<ul style="list-style-type: none"><li>• Check for conditions that cause increased anesthetic risk (ie – heart murmurs)</li><li>• Check for additional surgical procedures that can be completed while anesthetized (ie – removal of baby teeth)</li><li>• Provide pre-anesthetic calming agents to reduce stress</li></ul>		<ul style="list-style-type: none"><li>• IV fluids</li><li>• Surgery</li><li>• Surgical supplies</li><li>• Anesthetic monitoring</li></ul>	
Pre-Anesthetic blood work	\$90	Medication bundle	\$45
<ul style="list-style-type: none"><li>• Check organ function to assess anesthetic risk</li></ul>		<ul style="list-style-type: none"><li>• Anesthetic medications</li><li>• Post-operative pain control</li><li>• The Cone of Shame</li></ul>	
TOTAL	\$210	TOTAL	\$355

**Total Cost = \$565 + Tax**

## Surgical Add-Ons

### Other things that can be done at the time of Spay

---

We often perform additional preventive medicine treatments at the same as the spay while your cat is under anesthetic. These treatments can be included at an additional fee.
